# Expand into New Markets

## *Go global with UPS Customer Solutions*

In today's increasingly connected world, it's easier than ever before to reach customers all over the globe.

However, doing business globally can be overwhelming. From duties & taxes and customs clearance, to tracking & notifications and cross-border reverse logistics, there are so many variables to consider.

The world's supply chains are constantly changing, so whether you're entering a new market for the first time, or looking to optimize your current international operations, it's fair to say there is **a lot** to think about.

UPS Customer Solutions can help. Our consultants work closely with a broad range of experienced teams to offer you a comprehensive, end-to-end evaluation of your global supply chain to uncover the possibilities.

With the right solutions in place, doing business globally can feel simple.

## Local knowledge, global reach

Backed by over 100 years of global logistics experience, our teams have the local knowledge and the global network to support you every step of the way.

Whether you're looking to expand into new markets, targeting diversification, or exploring new international strategies, we will help you make the right decisions for your business.

With UPS you don't have to navigate the complexities of global trade alone. We have local teams in over 220 countries that can help you gain efficiencies throughout your international operations while enhancing customer experience and improving your bottom line.
